## EXPERIENCE

### **Analytics Engineer, American Technology Consulting Jun 2023-Oct 2025**

- Led analytics delivery for 150+ U.S. and global enterprise clients, building scalable reporting solutions serving 100,000+ platform users
- Redesigned BigQuery warehouse models (fact/dimension tables), correcting join logic and optimizing with window functions - improving data accuracy by 40% and reducing query time by 30%
- Built and maintained 20+ multi-tenant Power BI dashboards enabling clients to monitor user training, engagement, and performance metrics in real time
- Delivered client-specific ad-hoc reports analyzing revenue, churn, and operational KPIs on demand
- Developed Python-based ETL pipelines and API ingestion workflows (via Dify) to support AI-powered customer support model training
- Acted as liaison between clients, engineering, and product teams; led daily stand-ups and improved feature delivery turnaround by 25%
- Participated in hiring and scaling the analytics team

### **Data Engineer, Onward Technologies Mar 2021-Aug 2022**

- Designed Azure Data Factory pipelines integrating financial and operational data across 6+ global business units with daily refresh cycles
- Developed Azure SQL/Synapse data models supporting global revenue analysis across 100+ client accounts and \$300 million annual revenue streams
- Built executive Power BI dashboards enabling real-time visibility into revenue by BU, regional BU, client, and project; tracked allocation of 200+ resources across engagements
- Automated CapEx/OpEx workflows across departments, reducing approval cycle time by ~70% and eliminating manual email-based tracking
- Digitized client onboarding workflows for sales teams, reducing onboarding turnaround by ~35% and improving data accuracy
- Implemented incremental load strategies and validation checks, reducing reporting latency by 30%

### **Data & Systems Analyst, Alfa Facade Systems Apr 2020-Mar 2021**

- Built centralized MS SQL reporting database consolidating financial and procurement data across 5+ live projects and 40+ vendors
- Developed 8+ Power BI dashboards tracking project budget variance, procurement turnaround, and vendor performance, improving cost visibility by 60%
- Automated CapEx/OpEx approval workflows using PowerApps & Power Automate, reducing processing time from 5 days to 1 (80% improvement)
- Streamlined vendor onboarding process by digitizing documentation and approval flows, reducing onboarding time by ~40%
- Reduced manual reporting and reconciliation effort by 50% through Python-based ERP data transformation scripts

## PROJECTS

### **Quantum Data Analytics Job Simulation**

**July 2024**

- Utilized transaction datasets to extract insights & deliver data-driven commercial recommendations
- Identified benchmark stores for conducting uplift testing on trial store layouts, enabling evidence-based decision-making

## SKILLS

- **Programming Languages:** Python, R, Java, Bash
- **Database Management:** MySQL, MS SQL, PostgreSQL
- **Microsoft Office Suites:** MS Word, Excel, PowerPoint, SharePoint, PowerApps, Power Automate
- **Project Managements & Collaboration Tools:** Azure DevOps, Slack, MS Teams, Jira
- **Code Management Systems:** Git, GitHub, BitBucket
- **Data Analysis & Visualization:** Tableau, MS Power BI, DAX, Cube.dev
- **Cloud Services:** AWS, Azure, GCP

## EDUCATION

### **Stevens Institute of Technology**

M.S., Data Science  
May 2024 | Hoboken, NJ  
GPA: 3.8/4

### **Vishwakarma Institute of Technology**

B.Tech., Electronics Engineering  
May 2021 | Pune, India  
GPA: 8.1/10

## PUBLICATIONS

- *"Decentralized Voting System"* IJRECE, Volume 7, Issue 2 (April-June 2019)
- *"Autonomous Tennis Ball Picking Robot"* IJSART, Volume 5, Issue 12. (December 2019)

## COURSEWORK

Data Structures & Algorithms  
Database Management Systems  
Statistical Analysis  
Optimization for Data Science  
Linear Algebra  
Time Series Analysis  
Applied Machine Learning  
Natural Language Processing (NLP)  
Deep Learning

## CERTIFICATIONS

Applied Statistics Graduate Certificate  
AWS Cloud Solutions Architect (in-progress)
